

CORONAVIRUS COVID-19 MITIGATION STATEMENT

Golledge Electronics is continually monitoring the developing outbreak of COVID-19 and is working hard to reduce the impact of this coronavirus on all of our customers.

Mitigation Measures

In order to comply with UK Government directives regarding the developing COVID-19 situation we have put in place a number of measures in order to minimize the risk of our employees and our business. These include taking steps to minimize person to person contact including: cancelling all business travel, conducting meetings remotely, and personnel working from home wherever possible. We are confident that we will remain able to offer "business as usual" and provide the highest level of service as expected by our customers.

Product Supply

We have firm commitments from our key supply chain partners that ensure we will be able to fulfill the vast majority of orders with no delay in shipments. We are continuing to monitor this situation closely and will update our customers as required with Order Status Reports as appropriate.

Despite our best efforts, in a minority of circumstances we may not be able to guarantee on-time delivery and therefore we suggest that customers review their safety stocks and speak to our team to reduce the risk of any manufacturing impacts at the customer's facility. For prudence we are advising all customers to review their 6-18 month forecasts and to contact our team with their requirements as soon as possible.

National Ventilator Effort

We appreciate that many of our CEM customers may be converting their manufacturing lines to producing ventilators in order to meet Government requests. If this is the case for your facility please get in touch with our team today and we will be able to allocate crystal stocks for this effort. You can speak to a member of our expert team on +44 1460 256 100 or email sales@golledge.com.
